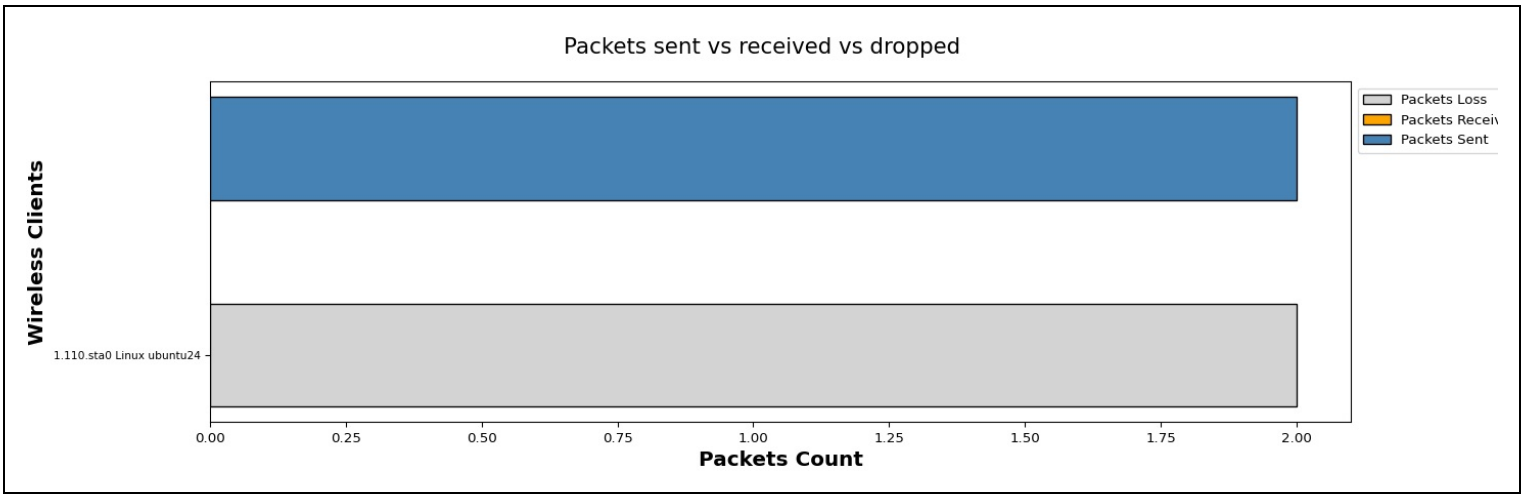
## Objective

The objective of the ping test is to evaluate network connectivity and measure the round-trip time taken for data packets to travel from the source to the destination and back. It helps assess the reliability and latency of the network, identifying any packet loss, delays, or variations in response times. The test aims to ensure that devices can communicate effectively over the network and pinpoint potential issues affecting connectivity.

## Packets sent vs packets received vs packets dropped



| Wireless Client | MAC | Channel | SSID | Mode | Packets Sent | Packets Received | Packets Loss |

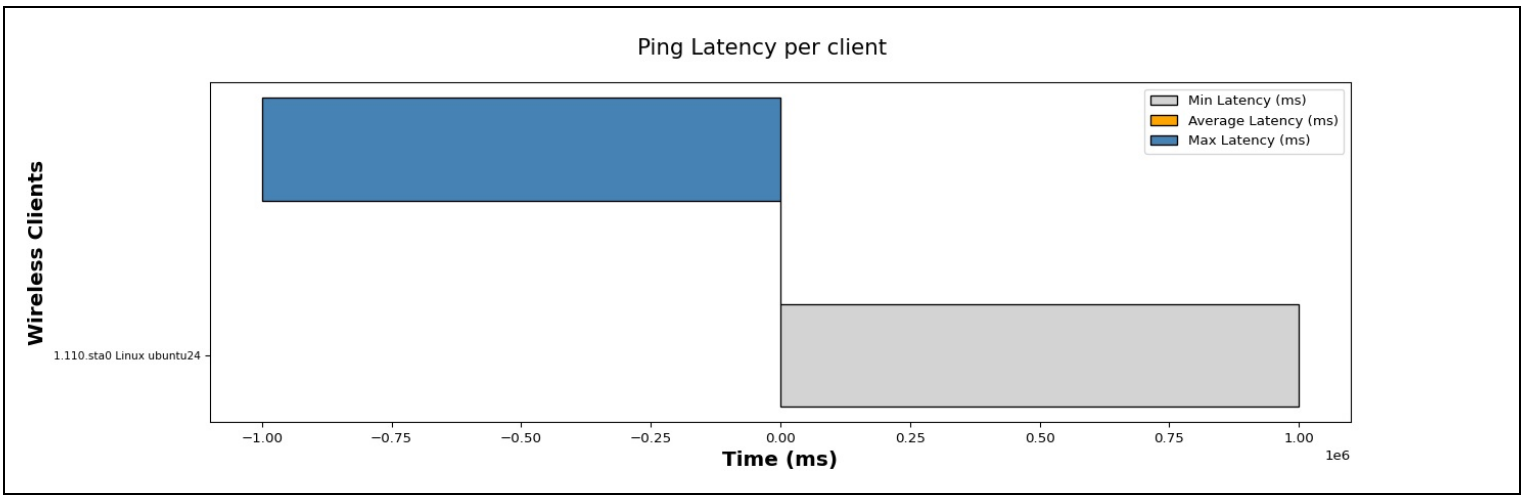
## Ping Latency Graph



| Wireless Client | MAC | Channel | SSID | Mode | Min Latency (ms) | Average Latency (ms) | Max Latency (ms) |
