Ping Test Report

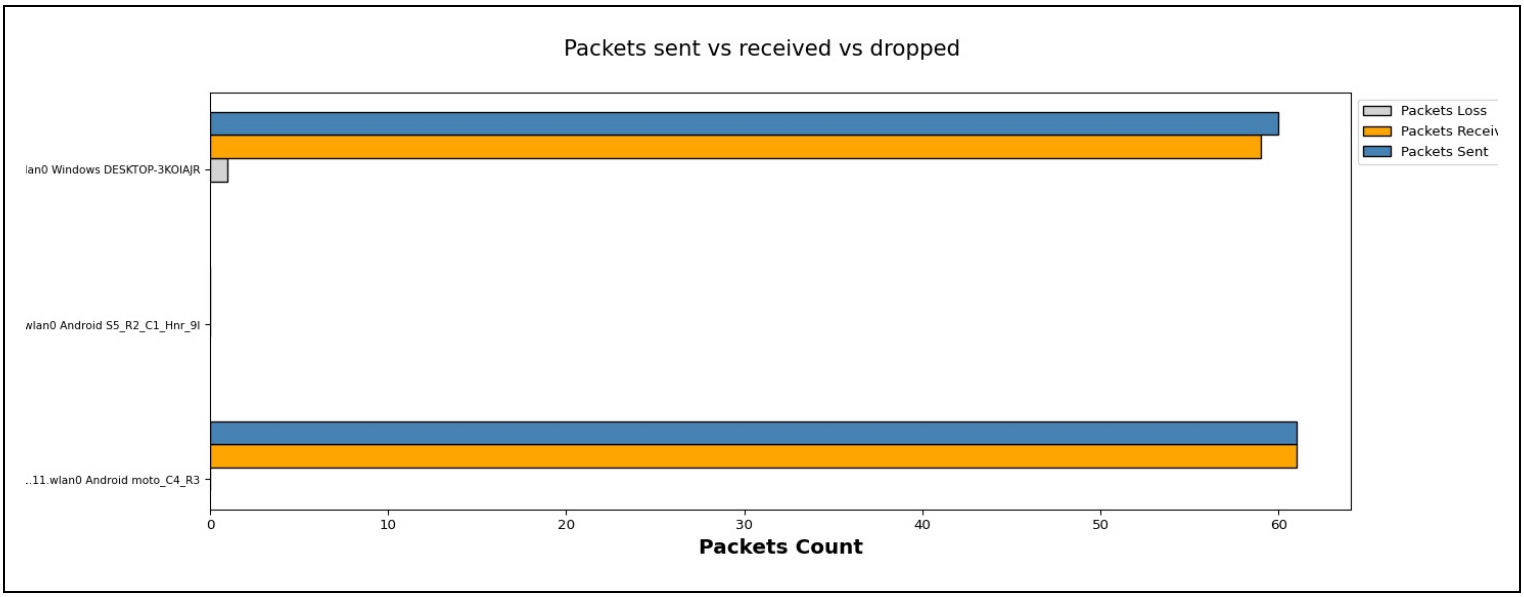
2025-10-14-16-44-44

Test Setup Information	SSID	Test Configured
	Security	Test Configured
	Website / IP	google.com
	No of Devices	3 (V:0, A:2, W:1, L:0, M:0)
	Duration (in minutes)	1.0

Objective

The objective of the ping test is to evaluate network connectivity and measure the round-trip time taken for data packets to travel from the source to the destination and back. It helps assess the reliability and latency of the network, identifying any packet loss, delays, or variations in response times. The test aims to ensure that devices can communicate effectively over the network and pinpoint potential issues affecting connectivity.

Packets sent vs packets received vs packets dropped



Wireless Client	MAC	Channel	SSID	Mode	Packets Sent	Packets Received	Packets Loss
